

# Report access made easy...with BI-CONNECT

BI-CONNECT provides a unified access to reports contained in your Business Objects Enterprise repository. This utility is designed for use as a building block in applications developed throughout your organization. Applications utilizing BI-CONNECT can access, refresh and view reports in their systems with minimal effort.

## HOW IT WORKS

BI-CONNECT enables request by name for any report in the repository. Simply submit parameters as required by the report and generate an Excel or PDF output stream. This stream may then be saved to a file or displayed in a browser. BI-CONNECT provides a unified mechanism for generating any report type in the Business Objects Enterprise system (Webi, Deski, or Crystal).

## BI-CONNECT's Key Benefits Include:

- » Utilize your existing BI Infrastructure
- » Multiple applications can access a single Reporting repository
- » No user training required
- » Out of the box solution
- » No need to learn BO SDK
- » Multiple platform support (.Net/J2EE)
- » Users can view reports in their own selected format
- » Cost effective and flexible solution
- » Access to Webi/Deski/Crystal Reports from anywhere

**Try BI-CONNECT free  
for 30 days and discover  
the power of this utility.**
