

# PowerStart for Crystal Xcelsius

PowerStart is designed to provide your organization with a prototype dashboard utilizing Crystal Xcelsius. It includes three days of consulting, both onsite and offsite, with a qualified TAKE Xcelsius professional who will develop the dashboard based on your specific needs.

*"I am happy to recommend PowerStart services"*

*"The PowerStart staff was responsive, knowledgeable and reliable."*

## The PowerStart custom approach includes the following:

- » Define your specific business requirements.
- » Review the data-source, determine Key Performance Indicators (KPI's) and explore all questions that need to be answered in the visual prototype.
- » Installation and Configuration of Crystal Xcelsius.
- » Design the MS Excel spreadsheet to be used as the data source for the Xcelsius prototype.
- » Develop a single screen dashboard that visually answers the questions identified in the planning phase.
- » Utilize the appropriate controls to make the dashboard visually appealing, interactive and user friendly.
- » Provide Best Practices for development of the MS Excel spreadsheets that lend themselves to deployment in Crystal Xcelsius dashboards.

## Crystal Xcelsius Dashboard in Action...

Daily Executive Report	Monthly Sales Analytic	Loans by Branch	Sales Visual Model

On completion of this program you will have a working dashboard that visualizes your data and answers specific business questions.
