FOR IMMEDIATE PRESS RELEASE

TAKE Solutions' Team to Showcase Enhanced PharmaReady eSubmissions Document Templates at DIA EDM in Philadelphia, PA

*Demonstrations of the document templates will be available on
February 7th at 10:30 a.m. in booth 109*

Raleigh, N.C. - January 30, 2008 — Today, TAKE Solutions' PharmaReady team announced it will release for the first time in public form its new eSubmission templates at the DIA EDM conference in Philadelphia, PA on February 7, 2008.

“What really differentiates our submission templates from others on the market is how well we've balanced powerful functionality, ease of use, and affordability”, stated Robert MacDougall, Executive Vice President, Sales and Marketing. “In keeping with the heritage of the PharmaReady solution suite, we wanted to offer templates that didn't require lots of training, offered incredible flexibility, and at an aggressively low price. In the end, Templates are as important to eCTD publishing as racing tires on a Formula 1 race car. Templates is where an FDA submission meets the road. Most importantly, our customer feedback validates this”, continued MacDougall.

PharmaReady DocTemplate is a powerful new Microsoft Word plug-in authoring tool providing the most commonly required functionality for creating submission-ready documents for CTD and eCTD submissions.

Further, when integrated with PharmaReady Templates, DocTemplate expedites publishing by using a consistent platform to generate documents with sound fundamentals.

PharmaReady Templates provide the blueprint for text, graphics, styles and formatting, thus minimizing many repetitious and time-consuming authoring functions. Even writers with limited knowledge of Microsoft Word can use them. With PharmaReady DocTemplate at hand, authors simply click their way to well-formatted documents, saving time and eliminating non-compliant glitches.

Both the PharmaReady DocTemplate authoring tool and PharmaReady Templates are designed with an eye toward conformity and compliance. They can be adapted and customized to accommodate in-house styles and specific content for any size organization.

The PharmaReady DocTemplate Authoring Tool and Templates are practical solutions for achieving agency-mandated consistency and increasing productivity at the critical start of the document management process.
