

TAKE Solutions' 'iPoint' achieves SAP Integration Certification

To leverage SAP customer base globally

Chennai, April 7, 2009 -- TAKE Solutions Ltd. (BSE: 532890), leaders in Supply Chain Management (SCM) and Life Sciences products, have now been granted a certification by SAP for their product iPoint, which is a Trading and Accounting Process Automation Solution.

Mr. Sridharan Sivan, Managing Director, TAKE Solutions said that, “The new version of the product, iPoint, which is slated for release in May 2009, is a smart solution to cut cost and drive efficiencies in the supply chain. iPoint’s SAP certification validates TAKE Solutions’ capabilities to provide professional Supply Chain Management solutions to customers worldwide. This confirms our continuous endeavour to provide the best in class SCM solutions to our clients and increases our credibility with them because of quick sales and rapid deployment of the product.”

When the clients have to cut cost and drive efficiencies in their supply chain, they need to get a 360-degree view of demand and the capability to replenish the channel with the right inventory at the right time, to capitalize on the market opportunity. Businesses that sell their products through distributors rely on market level product off-take data that may be 4 to 13 weeks old. The forecast is inaccurate since sales to distributors are often used as a surrogate to market level off-take. Replenishments are consequently on a push mode and opportunities for market interventions are not made best use of.

“The iPoint is a smart solution for secondary sales visibility, demand forecasting, automatic channel replenishment and market interventions. With iPoint our clients can look at the market level sales and inventory data across multiple dimensions - products, geographies, customers and sales organizations to sense any changes that may require immediate intervention. This certification furthers our ability to work with our clients to enable them to further optimize their IT investments. They can

now integrate our product with SAP with no data redundancy and hence lead to better supply chain execution,” Mr. Sridharan Sivan, Managing Director, TAKE Solutions added.

This is the second product in the last 6 months to be certified by SAP. CLM, TAKE’s product for managing compliance to product labeling statutes and mandates, was certified in December 2008.
