

**TAKE – Microsoft Strategic Alliance** is focused on helping organizations with value added solutions and services by leveraging TAKE's deep industry domain competencies and Microsoft's proven technology capabilities.

Being a Gold Certified Partner of Microsoft for over 12 years, TAKE provides end-to-end solutions and services across the entire spectrum of Microsoft Technologies.

TAKE's unique Solution Framework, built on **Microsoft Office SharePoint 2007 (MOSS)** platform, is helping our clients significantly increase revenue and productivity while reducing costs.

TAKE has a large certified talent pool committed to providing business solutions technology strategy, enterprise architecture design, application implementation, infrastructure set up, systems integration, and managed services to its clients around the world.

**TAKE Solutions** is an award winning partner of Microsoft and a Gold Certified Microsoft Partner for the last 12 years.

TAKE is listed as one of the fastest growing 50 technology companies by Deloitte in 2007. We offer end-to-end solutions and services around Microsoft Office SharePoint (MOSS) 2007 platform and other Microsoft Technologies.

TAKE Solutions has a dedicated focus on the Life Sciences Industry and Supply Chain Industry with over 300 clients around the globe.

TAKE Solutions is an ISO 9001 certified and a CMMI Level 5 certified firm.

## Alliance Vision

TAKE's vision is to become the **partner-of-choice** to Microsoft and its clients world-wide by providing best-in-class solutions and services, on time and within budget.

## Center Of Excellence

TAKE's center of excellence for Microsoft is its virtual innovation center focused on building cutting edge technology solutions aligned to clients' business needs.

TAKE - Microsoft Center of Excellence comprises people, process and technology strategies and acts as a repository of best practices and reusable solutions.

## Alliance Success

TAKE has undertaken a strategic technology project with the University of Southern California while working closely with the domain experts from Microsoft's Public Sector Education Unit.

The collaborative solution using .NET technologies and SharePoint platform is successfully deployed to the EPGP Project (Epilepsy Phenome Genome Project)

## TAKE - EPGP Project Overview

**Project Name:** Epilepsy Phenome / Genome Project (EPGP)

\$15 Million NIH Genome Grant

50 Researchers from 15 Medical Centers, 3,750 Patients and over 3,000 Controls

**Partners:** TAKE, University of Southern California & Microsoft
